About Us & Infrastructure

At Micro Vision, we specialize in high-performance LED display manufacturing and industrial automation systems. With over 3 years of hands-on expertise in advanced hardware integration, we design, assemble, and deliver cutting-edge visual solutions tailored to your business needs.

Our modern infrastructure is equipped to handle precision assembly, meticulous custom wiring, and rigorous quality testing. From single-color scrolling boards to massive indoor and outdoor video walls, we ensure every display is built for maximum brightness, durability, and seamless performance.

Indoor LED Display Solutions

Bring your indoor spaces to life with high-definition, seamless LED video walls. Engineered for close-up viewing, our indoor displays feature ultra-high refresh rates, silent operation, and brilliant color reproduction. Perfect for corporate offices, banquet halls, retail showrooms, and auditoriums.

- Available Pixel Pitches: P1.8 / P2.5 / P3 / P4
- Brightness: 600 – 1,200 Nits (Perfect for indoor ambient lighting)
- Refresh Rate: > 1920Hz – 3840Hz (Flicker-free on camera)
- Cabinet Material: Lightweight Slim Die-Cast Aluminum
- Maintenance: Front-serviceable magnetic modules for easy maintenance

Outdoor LED Display Solutions

Command attention in any environment with our high-brightness, heavy-duty outdoor LED video walls. Engineered to withstand harsh weather conditions, these displays offer exceptional sunlight visibility, wide viewing angles, and long-lasting performance. Ideal for commercial billboards, building facades, sports stadiums, and outdoor retail advertising.

- Available Pixel Pitches: P4 / P5 / P6 / P8 / P10
- Brightness: 5,500 – 7,500 Nits (Ultra-bright for direct sunlight visibility)
- Waterproof Rating: IP65 / IP66 Front & Rear (Fully weatherproof against dust and heavy rain)
- Cabinet Material: Rugged Die-Cast Aluminum or Heavy-Duty Iron Cabinet

Rental & Event LED Solutions

Elevate your live events, concerts, weddings, and corporate exhibitions with our premium rental LED screens. Engineered specifically for the fast-paced event industry, these displays offer exceptional visual clarity, fast assembly, and robust transport handling to ensure your show runs flawlessly every time.

- Ultra-Lightweight Cabinets: Slim die-cast aluminum panels designed for effortless rigging, hanging, and stacking.
- Fast-Lock Mechanism: Quick-locking systems that allow a single technician to assemble large video walls in minutes.
- High Refresh Rate: > 3840Hz ensuring flicker-free, crisp display performance on live TV and phone cameras.

Capture the attention of passing foot traffic with high-visibility LED scrolling boards. Designed as a cost-effective advertising medium for retail shops, commercial centers, and public displays, these single and dual-color signs offer bright, clear text messaging that operates 24/7 with minimal power consumption.

- Smart Wireless Programming: Easily update messages, offers, or announcements in seconds via a mobile app (Wi-Fi) or a USB drive.
- Vibrant Color Options: Available in high-brightness Single Color (Red, Green, Amber, White) or Dual-Color display configurations.

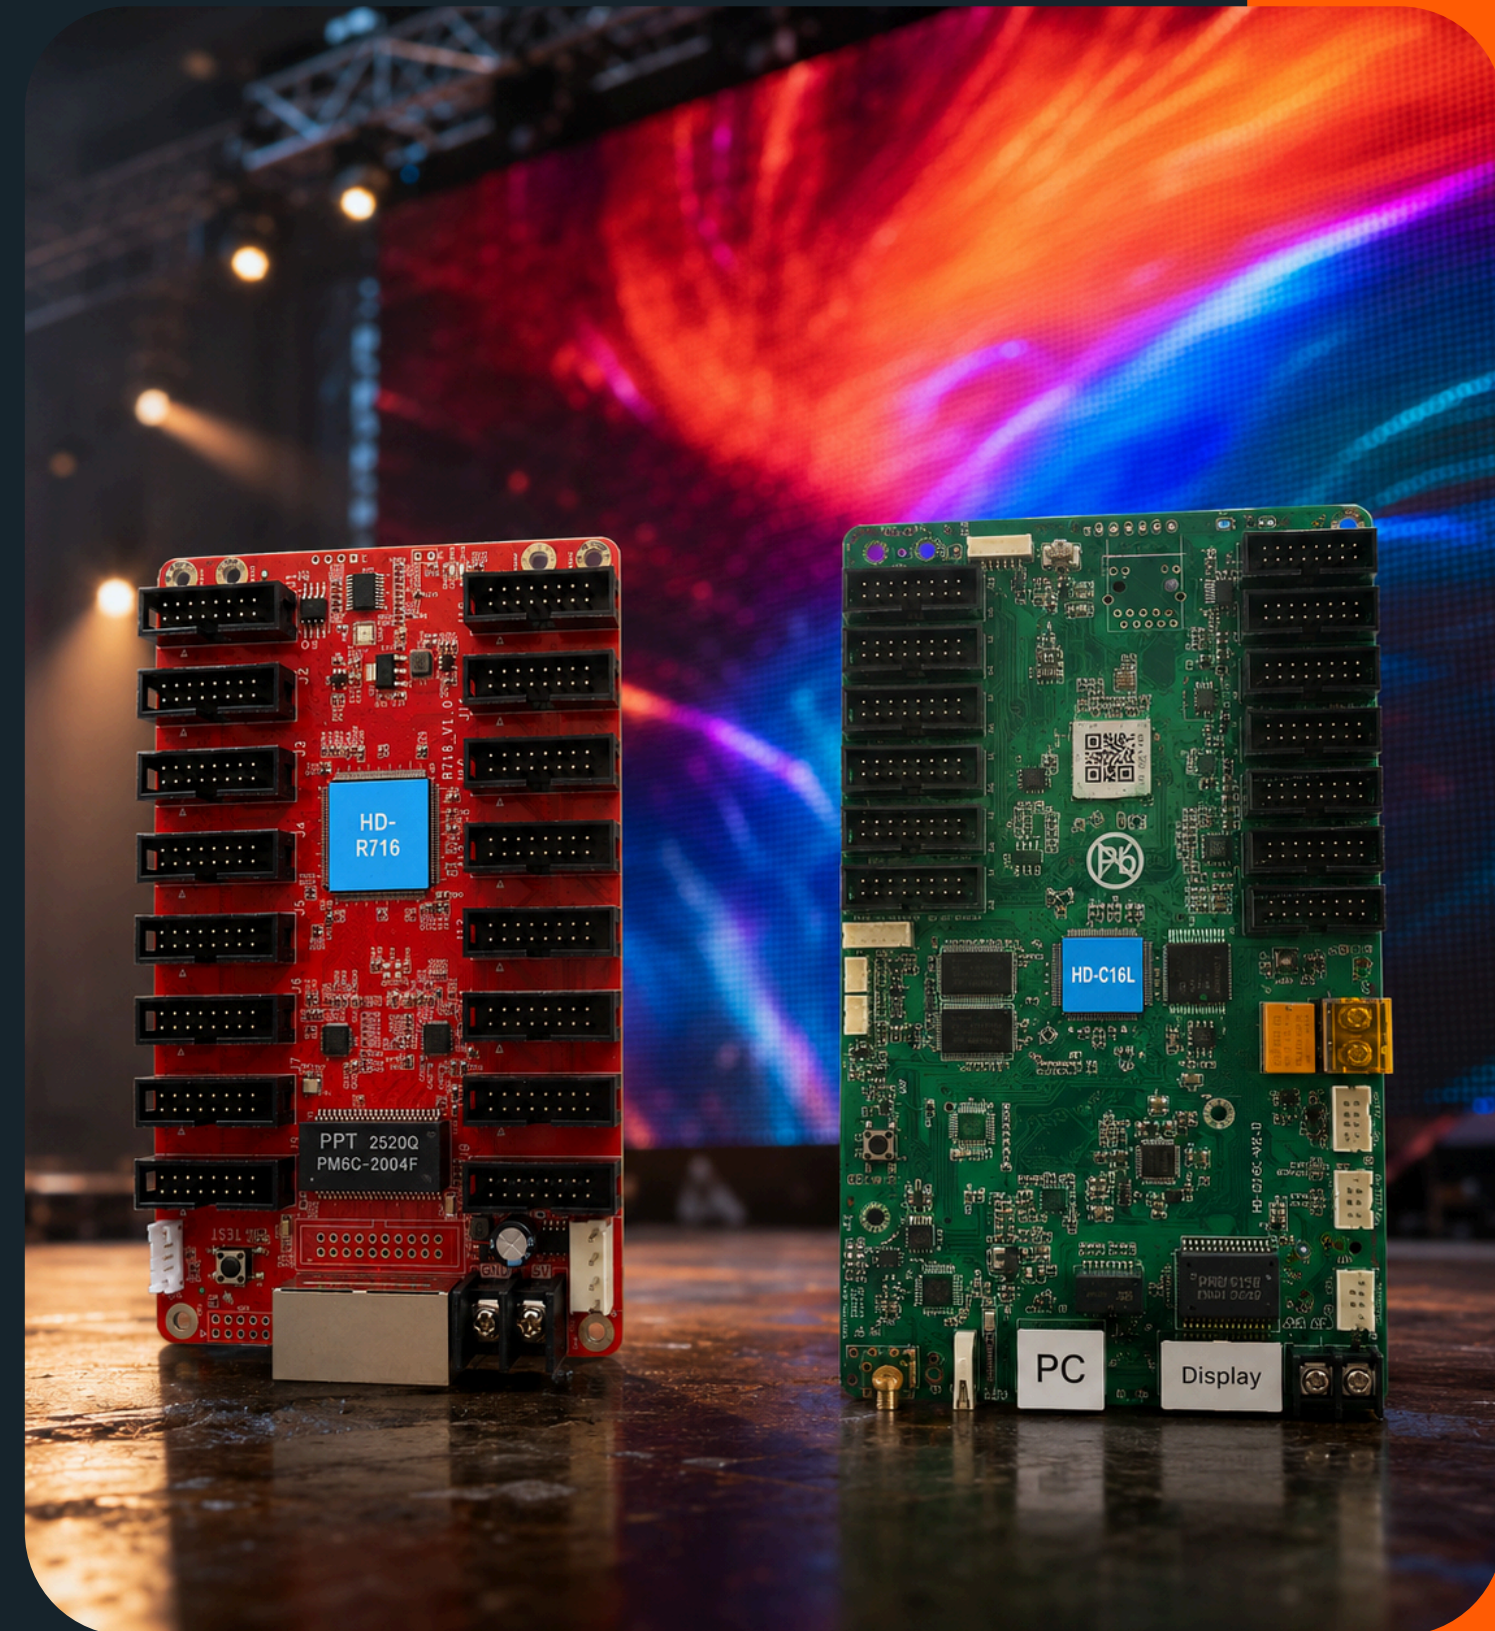

LED Scrolling Boards & Retail Displays

-
-
-
- Our displays are powered by industry-leading control systems and high-grade internal components, ensuring seamless video processing, brilliant grayscale performance, and absolute operational stability. We program and configure our systems to give you complete, hassle-free management over your visual content.

- Industry-Standard Video Processors: Integrated with elite control hardware (NovaStar, HD, or Colorlight) for multi-window pipelining and smooth video scaling.
- Synchronous & Asynchronous Modes: Play live feeds directly from a PC/HDMI source, or pre-load media to run autonomously from internal storage.

Advanced Control Systems & Features

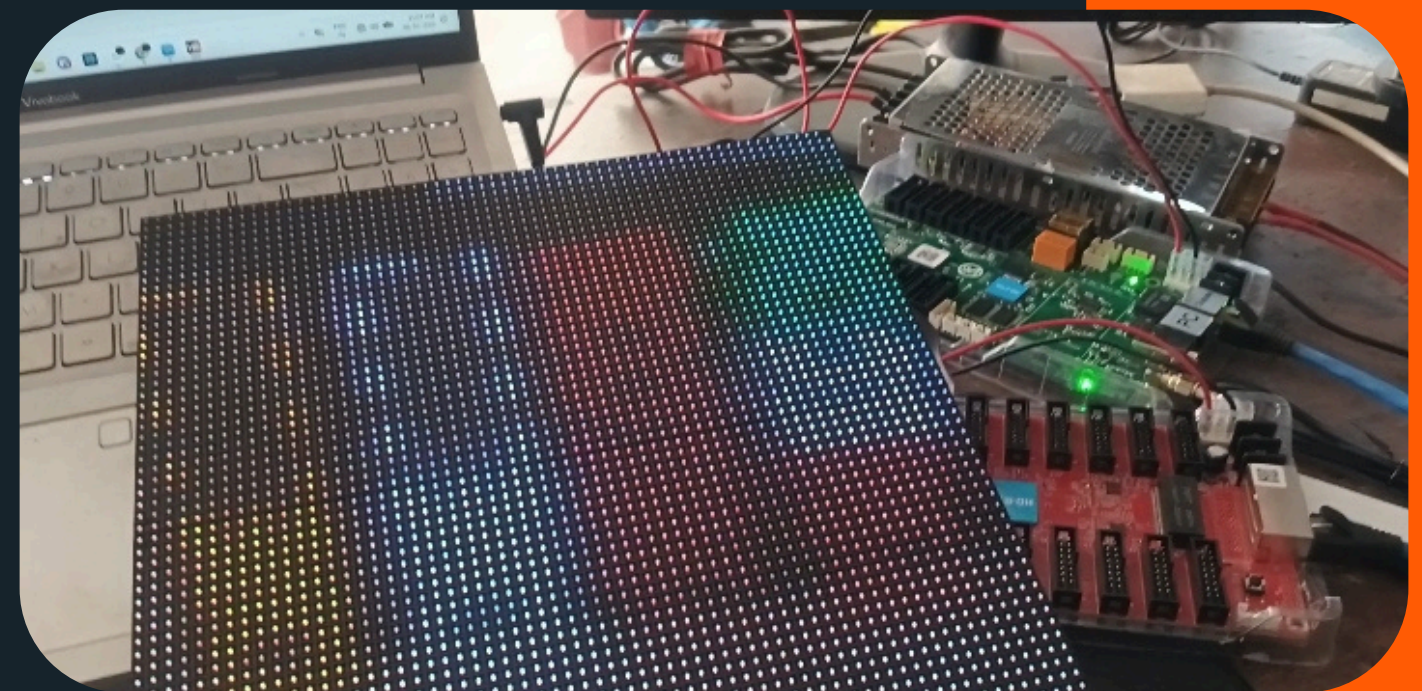

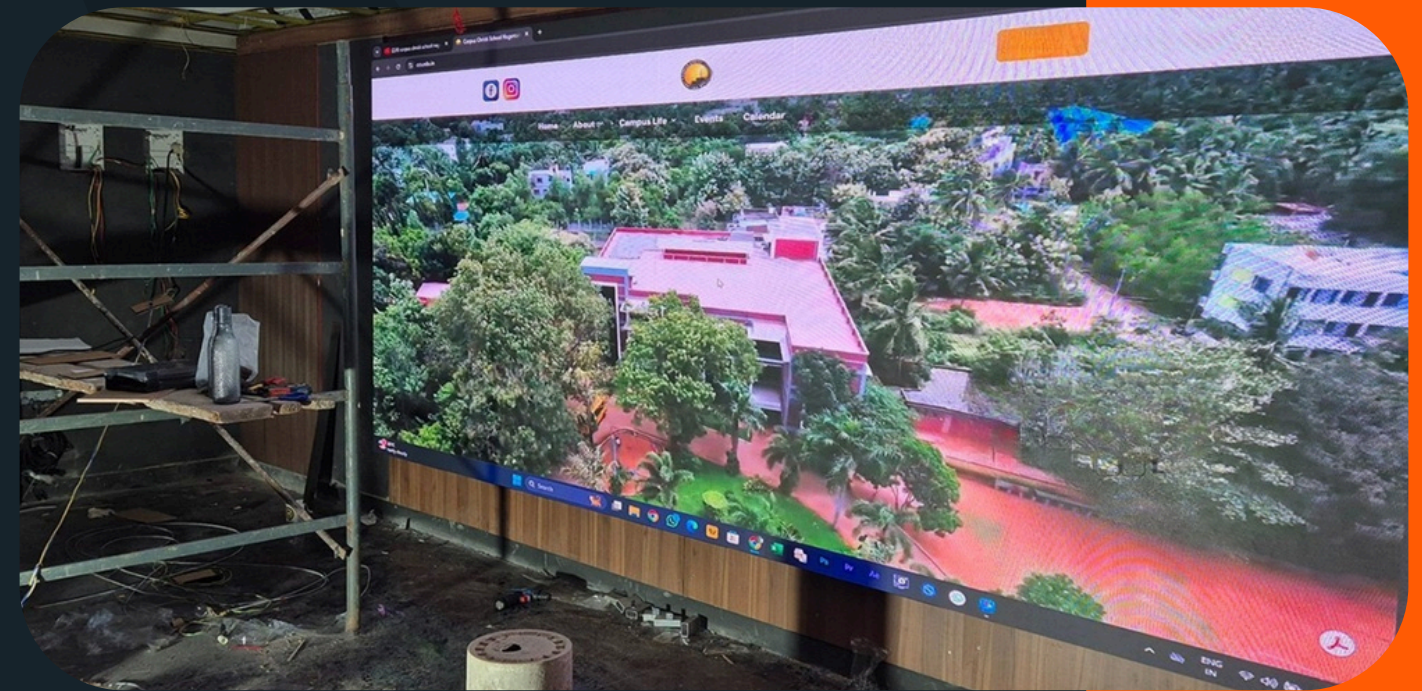

Uncompromised Quality & Assurance

At Micro Vision, manufacturing isn't just about assembling components—it's about engineering reliability. Every single LED panel we build goes through a strict, multi-stage quality control workflow in our facility to guarantee flawless performance, uniform brightness, and a long operational lifespan before it ever reaches your site.

- 72-Hour Continuous Burn-in Test: Every screen undergoes a continuous 72-hour power and aging test to identify and resolve any module pixel anomalies.
- Precision Thermal & Load Balancing: Internal wiring and power load configurations are expertly distributed to ensure uniform heat dissipation and zero circuit strain.
- Local Technical Support: Because we manufacture locally, we provide fast, direct technical assistance, quick system calibrations, and immediate component availability.

Proven Across Diverse Industries

Our manufactured LED solutions are versatile, engineered to adapt seamlessly across various commercial, public, and promotional landscapes. From standalone retail advertising units to high-impact live backdrops, we build displays that deliver maximum visibility and value.

- Retail & Storefront Advertising: High-brightness commercial boards designed to draw massive foot traffic to local businesses and showrooms.
- Corporate & Command Spaces: Seamless, high-resolution indoor video walls tailored for boardrooms, receptions, and presentation environments.
- Live Events & Backdrops: Portable, rapidly deployable rental screens engineered for premium stage setups, weddings, and public gatherings.
- Public Information Displays: Reliable scrolling text boards and multi-color signs built for continuous 24/7 informational routing.
